

SAJID ISLAM

EDUCATION

Bachelor of Computer Science Honours, Co-op

Sept 2020 – Aug 2025

Carleton University, Ottawa, ON

- Graduated with High Distinction | GPA: 3.73/4.0 (A-)

WORK EXPERIENCE

Digital Product Developer

Sept 2025 – Present

House of Commons, Ottawa, ON

- Maintained and enhanced 4 different desktop and web-based applications built with .NET (C#), gaining deep familiarity with existing systems quickly to support system stability, troubleshooting, and feature updates
- Designed REST API integrations between ServiceNow, Azure Cloud, and custom in-house applications, enabling secure, automated data flow across enterprise systems and streamlining critical IT operations
- Developed and customized applications on the ServiceNow platform, implementing workflows, business rules, and integrations to streamline and improve operational efficiency

Programmer / Student

Sept 2023 – Dec 2024; May 2025 – Aug 2025

House of Commons - Corporate Systems, Ottawa, ON

- Led the team to develop custom automated build and deployment pipelines for over 30 products, significantly enhancing efficiency and consistency of deployments, cutting release times from hours to seconds
- Created an automated Azure cloud hosted service using C# for syncing critical security data, reducing manual labour and minimizing human errors
- Developed and deployed a REST API endpoint service, enabling seamless integration and communication between multiple software applications.

Co-op Student

Sept 2022 – Dec 2022

House of Commons - Physical Security, Ottawa, ON

- Developed and tested the automated deployment product using PowerShell for managing security software on target nodes, ensuring quick delivery of critical security infrastructure across Parliament
- Streamlined and implemented new features and enhancements to the pipeline using Azure resulting in better-automated testing, increased efficiency during build time and reduced processing times

Programmer Analyst / Co-op Student

May 2022 – Aug 2022

Global Affairs Canada, Ottawa, ON

- Designed well-functioning and accessible government visual online forms for agencies using JavaScript and Adobe Experience Manager to deliver software depended on by thousands of people within the department

PROJECTS

GTFS Transit Routing | Java, Spring Boot, PostgreSQL, HTML/CSS, JavaScript, Python

- Designed and developed a full-stack application that utilizes GTFS (General Transit Feed Specification) data from OC Transpo to compute optimal transit routes between any two stops
- Engineered a custom Java algorithm that constructs a subgraph with topologically sorted ordering, earliest-arrival time nodes, and a single incoming-edge restriction per node to efficiently model transit routes
- Achieved $O(n)$ optimal route retrieval (where n is the length of the route) by exploiting the graph components

TECHNICAL SKILLS

- **Languages & Frameworks:** Java, Python, C#, JavaScript, React, Spring Boot
- **Tools & Platforms:** Git, Visual Studio, Azure DevOps, PowerShell
- **Databases:** PostgreSQL, Microsoft SQL Server
