

SAJID ISLAM

WORK EXPERIENCE

Digital Product Developer

Sept 2025 – Present

House of Commons

Ottawa, ON

- Developed and maintained JavaScript based ServiceNow Business Rules, Flow Designer workflows, and Service Portal enhancements for parliamentary ITSM systems serving 2,500+ users
- Refactored legacy C#/.NET codebases and CI/CD pipelines from non-functional states by reconciling source code with production changes and modernizing old build and deployment scripts
- Automated record creation through a REST API integration between ServiceNow and an internal application, implementing certificate-based authentication, retry handling and monitoring
- Advised multiple teams on CI/CD architecture across 50+ Azure DevOps pipelines defining reusable YAML templates/scripts, environment-specific configuration, and deployment protection standards
- Maintained and configured 48 Windows servers across 4 environments, overseeing database migrations, DNS management, load-balancing, and IIS configuration

Developer / Student

Sept 2023 – Dec 2024, May 2025 – Aug 2025

House of Commons - Corporate Systems

Ottawa, ON

- Owned an Azure-hosted C# service to automate bidirectional change tracking, record mapping, and retry handling between Microsoft SQL and a cloud service while preventing duplicate records and synchronization loops
- Led the team to develop custom automated build and deployment pipelines with rollback support for over 30 C#/.NET products, significantly enhancing efficiency by approximately 80%

Developer / Co-op Student

Sept 2022 – Dec 2022

House of Commons - Physical Security

Ottawa, ON

- Developed an automated deployment system using PowerShell to manage security software on Parliament Hill
- Streamlined and implemented enhancements and improved automated testing to the CI/CD pipeline reducing processing times by 35%

Programmer Analyst / Co-op Student

May 2022 – Aug 2022

Global Affairs Canada

Ottawa, ON

- Delivered 25+ WCAG aligned government forms by migrating legacy forms to Adobe Experience Manager and implementing JavaScript-based conditional fields and validation

EDUCATION

Carleton University

Sept 2020 – Aug 2025

Bachelor of Computer Science, Honours Co-op

Ottawa, ON

- Graduated with High Distinction — GPA: 3.73/4.0 (A-)
- Relevant Coursework: Algorithm Design & Analysis, Database Management, Data Science, Software Engineering, Operating Systems, Web Development, and Human-Computer Interaction

PROJECTS

GTFS Transit Routing | Java, Spring Boot, PostgreSQL, HTML/CSS, JavaScript, Python

[GitHub](#)

- Built a full-stack transit application with a Spring Boot REST API and PostgreSQL, parsing raw OC Transpo GTFS data to calculate routes with transfers and walking connections
- Engineered a custom earliest-arrival routing algorithm using topological ordering, cross-checking route results against existing transit applications

TECHNICAL SKILLS

Languages & Frameworks: C# / .NET, Java, Python, JavaScript, React, Spring Boot

Tools & Platforms: Git, Visual Studio, CI/CD Pipelines, Azure DevOps, Azure Cloud, ServiceNow, PowerShell

Databases: PostgreSQL, Microsoft SQL Server
